## **DETAILED ACTION**

### ***Double Patenting***

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1, 3-7, and 11 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 5-10, and 15 of copending Application No. 10/693,781. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

### ***Allowable Subject Matter***

3. Claims 2 and 8-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 12-24 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach or suggest a pair of extension springs and a pair of arms with each extension spring extending between a corresponding one of the arms and the pivot.

### ***Conclusion***

Art Unit: 2832

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nicol, Grenier, Fujihisa, Fasano, Link et al, Powell, Nar, Edds et al, and Bruckert et al teach various circuit breaker operating mechanism and operating handle structures.
